

Technology Pitch Deck

Presentated by Doimih

Technical Resume

AI-Native Software Engineer

Full-Stack • AI • DevOps • SaaS Architecture

projects.doimih.net Bucharest,
Romania

About me

Who I Am

AI-Native Software Engineer focused on:

- modular SaaS architecture
- enterprise AI integration
- multi-agent orchestration
- DevOps automation
- full-stack engineering
- premium operator-centric UX

I build scalable, secure, audit-ready platforms.

CORE STRENGTHS

My Strengths

- Full-Stack Development (Next.js, Node.js, Python)
- AI Integration & Automation
- DevOps (Docker, CI/CD, VPS)
- Modular SaaS Architecture
- Technical Documentation
- Operator Workflow Engineering
- Automotive Lighting Systems (intermediate)

TECH STACK

AI & Automation

- Multi-agent AI orchestrator
- AI tool-based workflows
- OCR pipelines
- AI-driven document workflows

Backend

- Node.js (NestJS, Express)
- Python (FastAPI)
- TypeScript
- PostgreSQL, Redis, Prisma ORM

Frontend

- Next.js 14
- React
- TailwindCSS, ShadCN, Framer Motion

DevOps

- Docker
- GitHub CI/CD
- VPS hosting
- Cloudflare

ARCHITECTURE PRINCIPLES

How I Build Systems

Modular SaaS

**Event-driven
microservices**

Multi-tenant

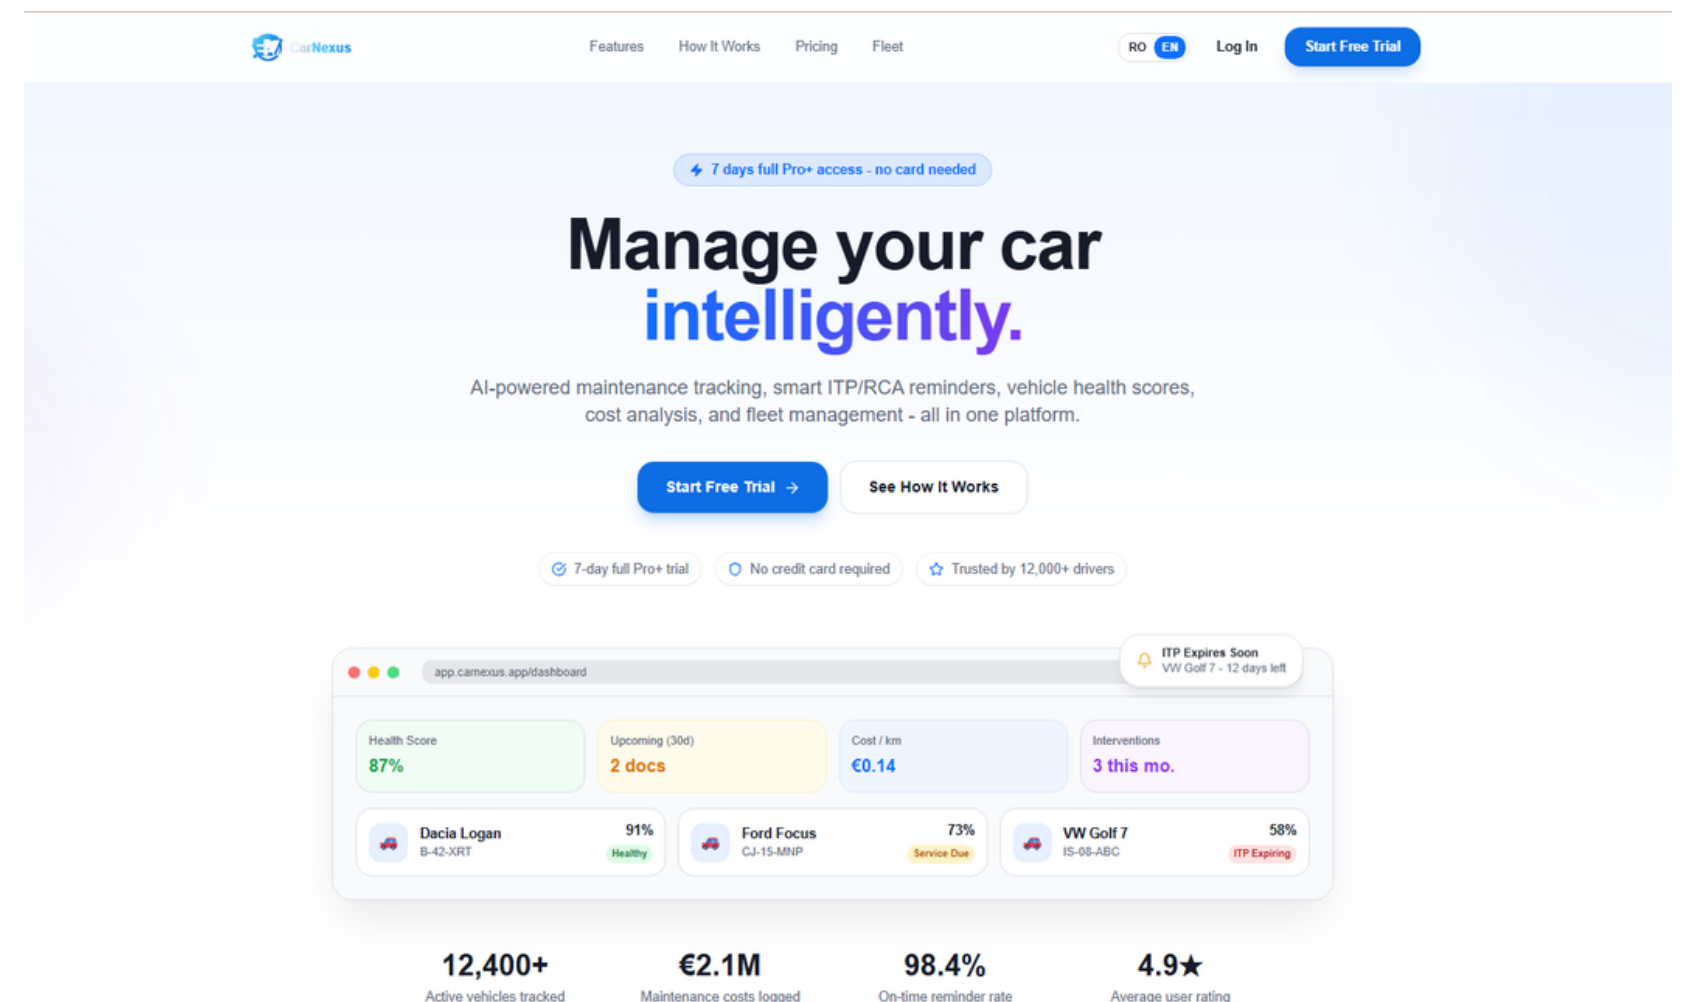

PROJECT: CARNEXUS

[Link](#)

Modular Fleet SaaS Platform

Key achievements:

- Fully modular architecture
- Per-vehicle pricing engine
- Integrated AI orchestrator
- CI/CD deployment
- RBAC + audit logs
- Scalable operator workflows

[Link](#)

PROJECT: NUTRIAID

Clean Eating & Weight-Loss Education Platform Highlights:

- AI modules for personalized recommendations
- Food intolerance workflow
- Premium mobile-first UI
- Educational content engine

Thank you
